

***Izame Zabanthu Nature Helpers***

The Plastics Federation of South Africa is grateful to be associated with the wonderful work of the Izame Zabanthu Nature Helpers at the mouth of the Black River in Cape Town.

Plastic leakage into the environment and especially the sea is of great concern to the plastics industry internationally and without the work done by this wonderful group of human beings and so many others, we would not be able to mitigate the pollution created by littering, dumping and poor waste management.

We appreciate the work done by this wonderful group of people and will continue to support the group for as long as it is needed.
