THE COMPLETE POWER PACKAGE

TO WHOM IT MAY CONCERN

Probe Corporation is proud to support the **Izame Zabantu Nature Helpers**, a new coastal clean-up initiative that is creating employment and removing thousands of bags of plastic from the ocean. Clean-up teams are currently working no more than three times a week to clear plastic and other rubbish at the Black River Mouth and beach at Paarden Eiland.

Along with skills development and job creation, environmental sustainability is a clear priority, and our sponsorships and corporate social responsibility investments reflect this. This initiative combines all three elements. We believe in supporting people who take action to make a difference. **Izame Zabantu** has great potential to expand nationwide, and we hope that our customers and partners will join us in supporting this vital initiative so that it can replicate and grow further.

We are impressed with how the young organisation is striving to clear up more plastic, create more jobs and contribute to building a stronger South Africa through collaboration, action and kindness. The organisation has been well set up from the outset, as funds are managed through registered and BBBEE-compliant partner NGO the Ikamva Labantu Charitable Trust and all donors receive a Section 18A tax certificate. We are looking forward to a long partnership.

Warm regards,
